

Enable and demonstrate best practice in IT Service Management with ISO/IEC 20000 certification.

ISO/IEC 20000 is an international standard that allows organizations to demonstrate excellence and prove best practice in IT service management.

The standard allows IT service provider organizations to achieve conformance to a service management system that requires them to continually improve their delivery of IT services and aligns with the ITIL® best practice framework.

ISO/IEC 20000 includes the design, transition, delivery and improvement of services that fulfil requirements and provide value for both the customer and the service provider.

It promotes the adoption of an integrated process approach to effectively plan, establish, implement, operate, monitor, review, maintain and improve a service management system.

Certified individuals help their organizations to:-

- Adopt and demonstrate compliance with a structured, internationally recognized approach to IT service management
- Enhance service delivery and better fulfil customer requirements
- Achieve a competitive differentiator for tendering and procurement
- Ensure IT service management practices are ready for the scrutiny of internal and external audits
- Establish an ongoing culture of continual improvement and learning.

FURTHER INFORMATION

WHO IS IT FOR?

ISO/IEC 20000 certification is designed for management and support personnel involved in the design, transition, delivery and improvement of IT services, equipping them with an understanding of a best practice, internationally recognized standard.
