

## Adopt an agile approach to programme management with our AgilePgM training and certification.

**The world of project and programme management has been evolving over recent years. Agile methods and practices have become increasingly popular as organizations seek to respond faster and more effectively to ever-increasing change requirements.**

**This is particularly true of project management and our AgilePM certifications are proving extremely popular.**

**What about programme management? What guidance and certifications are available for programme managers wishing to improve and demonstrate their agile credentials?**

APMG International has partnered with the Agile Business Consortium to create AgilePgM – guidance and a supporting certification scheme for agile programme management.

The guidance – much like the sister project management guidance – draws heavily on the content of the Agile Business Consortium’s Agile Project Framework - a long established, internationally recognized framework for agile project delivery.

It provides programme managers with a disciplined but flexible agile approach to the management of transformational organizational change, allowing for iterative and incremental delivery of outputs and benefits.

The governance model, contained within the guidance, ensures a programme will capture its vision, whilst empowering teams to work without undue interference. Built on firm foundations, the programme can evolve and react to business change in our increasingly dynamic world.

### FURTHER INFORMATION

#### WHO IS IT FOR?

The AgilePgM guidance and supporting training/certifications are aimed at aspiring and practicing programme managers and team members wishing to adopt a disciplined, flexible and collaborative approach to the management of large-scale business transformation activities (programmes).
