

Certify in PRINCE2® – the world’s most popular project management methodology – to enhance your chances of project success.

PRINCE2 is a structured, process-based methodology for effective project management.

It is based on a wealth of experience drawn from thousands of projects undertaken in organizations around the world.

With a strong focus on business justification, PRINCE2 provides a framework covering the wide variety of disciplines and activities required within a project.

Adopting PRINCE2 provides your organization’s projects with:

- A common, consistent approach
- A controlled and organized start, middle and end
- Regular reviews and assurance of progress against the plan and business case
- Flexible decision points and management control of any deviations from the plan
- Involvement of management and stakeholders at the right points during the project
- Good communication channels between the project and relevant business areas
- A means of capturing and sharing lessons learned

One of PRINCE2’s greatest strengths is that it is truly generic; the method can be applied to all types of projects regardless of scale, industry, sector and geography.

FURTHER INFORMATION

WHO IS IT FOR?

PRINCE2 certification is designed for current and aspiring project managers. It is also relevant to other key staff involved in the design, development and delivery of projects, including project board members, team managers, project assurance and support personnel, and operational line managers/staff.
